Chhindwada District. The mine has been closed down due to exhaustion of coal reserve.

(b) and (c) All the manpower of closed down Bansi Under Ground coal mine has been redeployed in other units within the Coal Company.

(d) and (e) Yes, Sir. Sharda Under Ground is an identified project for XI Plan period. The detailed project report for Sharda UG is under preparation. The project is envisaged to start coal production from the year 2010-11, subject to approval of the project by the competent authority depending on its financial viability.

The extractable coal reserve at Haradol UG project is a meagre 0.50 million tonne and the property lies in between two major faults. Due to very bad geological conditions, very limited life, poor capacity of production as well as recent steep hike in price of forest land, the proposition is estimated to be highly loss-making. Due to these reasons, the block is not included in the present production plans of the Western Coalfields Limited.
